ADVANCED INFERENCE SILICON INVESTORS FORUM

3–5 March 2027

Three days on AI inference hardware, and on what Africa can build with the resources it already has.

WHY THIS FORUM, AND WHY NOW

Inference is decided by silicon. Africa has what silicon needs.

AI demand is shifting from training models to running them, and in inference the winners are decided by cost per query, energy and latency, all of which come down to silicon.

Africa supplies many of the minerals chips and batteries depend on, has vast clean-energy potential and the world's youngest continental population, yet captures very little of the value in AI hardware. This forum asks how that changes, and where investors can back it.

AFRICA'S ADVANTAGE

Critical minerals
Copper, cobalt, manganese, lithium and more, upstream of every chip and battery.

Clean power
Solar, hydro and geothermal potential for low-cost, low-carbon compute.

People
The world's youngest continent: engineers, designers and users.

Data & languages
Over a thousand languages and unmet needs that edge inference can serve.

THE PROGRAMME

Three days, Wednesday to Friday

See the full programme

03 MARCH · WEDNESDAY

The Inference Economy
Opening plenary and keynotes on where the money is moving.

Chips for Inference
Accelerators, in-memory compute, low-precision arithmetic, packaging and energy per query.

04 MARCH · THURSDAY

Africa's Resource Advantage
Minerals, clean power and cooling, talent, data and languages.

Building Silicon in Africa
Design houses, open hardware and open EDA, packaging, test and bankable policy.

05 MARCH · FRIDAY

Deal Room
Curated hardware-startup pitches and closed-door one-to-one investor meetings.

Declaration & Gala
Capital roundtable, closing plenary, the Accra Declaration on African inference silicon, and gala dinner.

WHO WILL BE IN THE ROOM

Capital, silicon, minerals and policy, together

By invitation and open registration. We are inviting leading chip architects, hardware founders, funds, cloud operators, miners, energy producers and policymakers from Africa and around the world, alongside the investors and builders who register to attend.

Investors & funds
Venture, growth, sovereign and family-office capital, and development finance.

Chip designers & hardware founders
Architects and startups building accelerators and inference silicon.

Cloud & data-centre operators
Builders and buyers of compute across the continent.

Mining & energy companies
Owners of the minerals and power that hardware depends on.

Government & policy
Ministries, regulators and industrial-policy leaders.

Researchers & universities
Labs and graduate programmes training the next generation.

PASSES AND PRICING

Early-bird rates close 15 January 2027

All prices in US dollars (USD). Your pass is confirmed when payment is received.

Day Pass

USD 150

Standard rate

Any one day: sessions, exhibition and lunch.

Choose Day Pass

Delegate Pass

USD 450

Early bird · Standard USD 550

Three days: every session Wednesday to Friday, exhibition, daily lunch and certificate.

Choose Delegate Pass

Investor Pass

FULL ACCESS

USD 1,200

Early bird · Standard USD 1,500

Three days: Delegate access plus closed-door Capital Roundtables, Deal Room one-to-ones, VIP lounge and gala dinner.

Choose Investor Pass

Institutional Table

USD 5,000

Early bird · Standard USD 6,000

Five Investor Passes, a reserved gala table and logo in the programme.
